RAE-109

Portable Veterinary Gastroscope

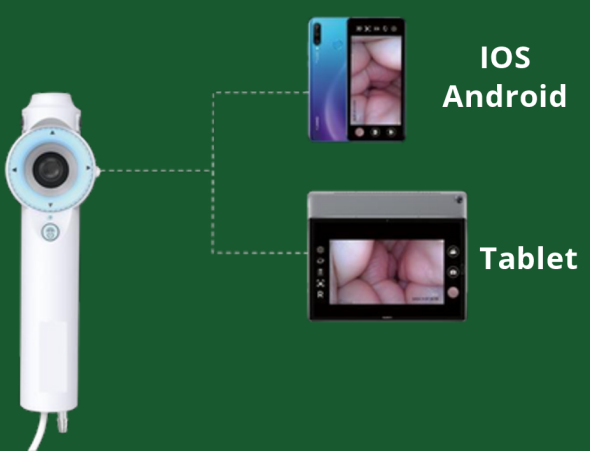

Lightness: Less than 1kg. Ensures maneuverability and ease of use, reducing operator fatigue during prolonged procedures. **Efficiency:** Quick and smooth diagnosis and treatment. Reduce operational difficulty and surgical time.

Compatibility: Suitable for small animals weighing less than 50KG, such as cats and dogs. **Durability:** Flexible tube undergoes rigorous aging tests. Designed for over 25,000 bends, guaranteeing long-term reliability. **Power source:** Endoscope operates without internal electric power, drawing power from the user's mobile phone.

PRODUCT APPLICATION

RAE-109 Portable Veterinary Gastroscope is suitable for lung lavage, foreign body removal, respiratory endoscopy, biopsy and minimally invasive surgery and examining stomach and duodenum of animals.

FEATURES

High quality image

Connect to smart devices, mobile phone, tablet or USB connection monitor.

Independent Water & air supply. Easy for cleaning the lens.

Working length:1200mm

360°Angulation control

Design patent

Small diameter, large channel

OD: 5.8mm, ID: 2.0mm

Ergonomic design of the handle

Reduce operational difficulty and surgical time

TECHNICAL PARAMETERS

Model	Outer diameter	Inner diameter	Working Length	Bending angle	Steering direction	Pix el s	Depth of field	Field angle
RAE-109	5.8mm	2.0mm	1200mm	180°	360°	1,000,000	7~100mm	120°
Accessories：alligator forceps, tripod forceps, grasping forceps with net, cleaning brush and etc.
