RAE-201

Veterinary Flexible Otoscope

Lightness: Less than 1kg. Ensures maneuverability and ease of use, reducing operator fatigue during prolonged procedures. **Efficiency:** Quick and smooth diagnosis and treatment. Reduce operational difficulty and surgical time.

Durability: Flexible tube undergoes rigorous aging tests. Designed for over 25,000 bends, guaranteeing long-term reliability. **Power source:** Endoscope operates without internal electric power, drawing power from the user's mobile phone.

PRODUCT OVERVIEW

The Veterinary Flexible Otoscope is suitable for ENT examination, lung biopsy, sampling, lung lavage and etc. of small animals.

FEATURES

Handheld design

Ergonomic, comfortable and convenient to operate

360° Angulation control

Design patent

Large field angle and depth of field

Wider observation range & longer observation distance

Efficient diagnosis & treatment

Reduce operational difficulty & surgical time

TECHNICAL PARAMETERS

Model	Outer diameter	Inner diameter	Working Length	Bending angle	Steering direction	Pix el s	Depth of field	Field angle
RAE- 201	3.1mm	1.2mm	600mm	180°	Up & down	160,0 00	3~100mm	120°
Accessories：biopsy forceps, Y-shape valve, Luer three-way connector, cleaning brush and etc.
